La Riera, 29, 08393 Caldes d'Estrac, Barcelona, Spain

Balneari Caldes d'Estrac

Project Overview

Balneari Caldes d'Estrac

Just outside Barcelona, overlooking the Mediterranean Sea, stands the four-star Balneari Caldes d'Estrac spa hotel.

Its history dates back to the last century, when it was a symbol of recuperation and vacationing.

Area: 20,000m²

To be Reborn

Yet as time passed, the hotel's charm was once overshadowed by its “age.”

A building gently embraced by time, it lacks no scenery, only a chance to be reborn.

Renovation

The hotel's requirements called for a renovation plan that preserves the original hot spring culture and architectural heritage while infusing the space with contemporary aesthetic significance.

After extensive communication and material selection, the design team ultimately chose

Vanlei Microcement
Solutions

They chose the

Vanlei Microcement System

A material that allows
spaces to “breathe.”

Model 6202

Vanlei Microcement / Advantages

Vanlei Microcement is a “lightweight restoration technique.”

It can revitalize spaces without compromising the original structure.

- ✓ Seamless integration with walls, floors, and ceilings
- ✓ High waterproofing and mold resistance, suitable for humid hot spring environments
- ✓ Soft reflections and delicate textures allow light to flow through the space. Warm grays and sandstone hues blend architecture seamlessly with the coastline. This is where function and artistry resonate.

Ordering – Production – Shipping

Order dispatch confirmation: A full container of Vanlei microcement is en route to Spain.

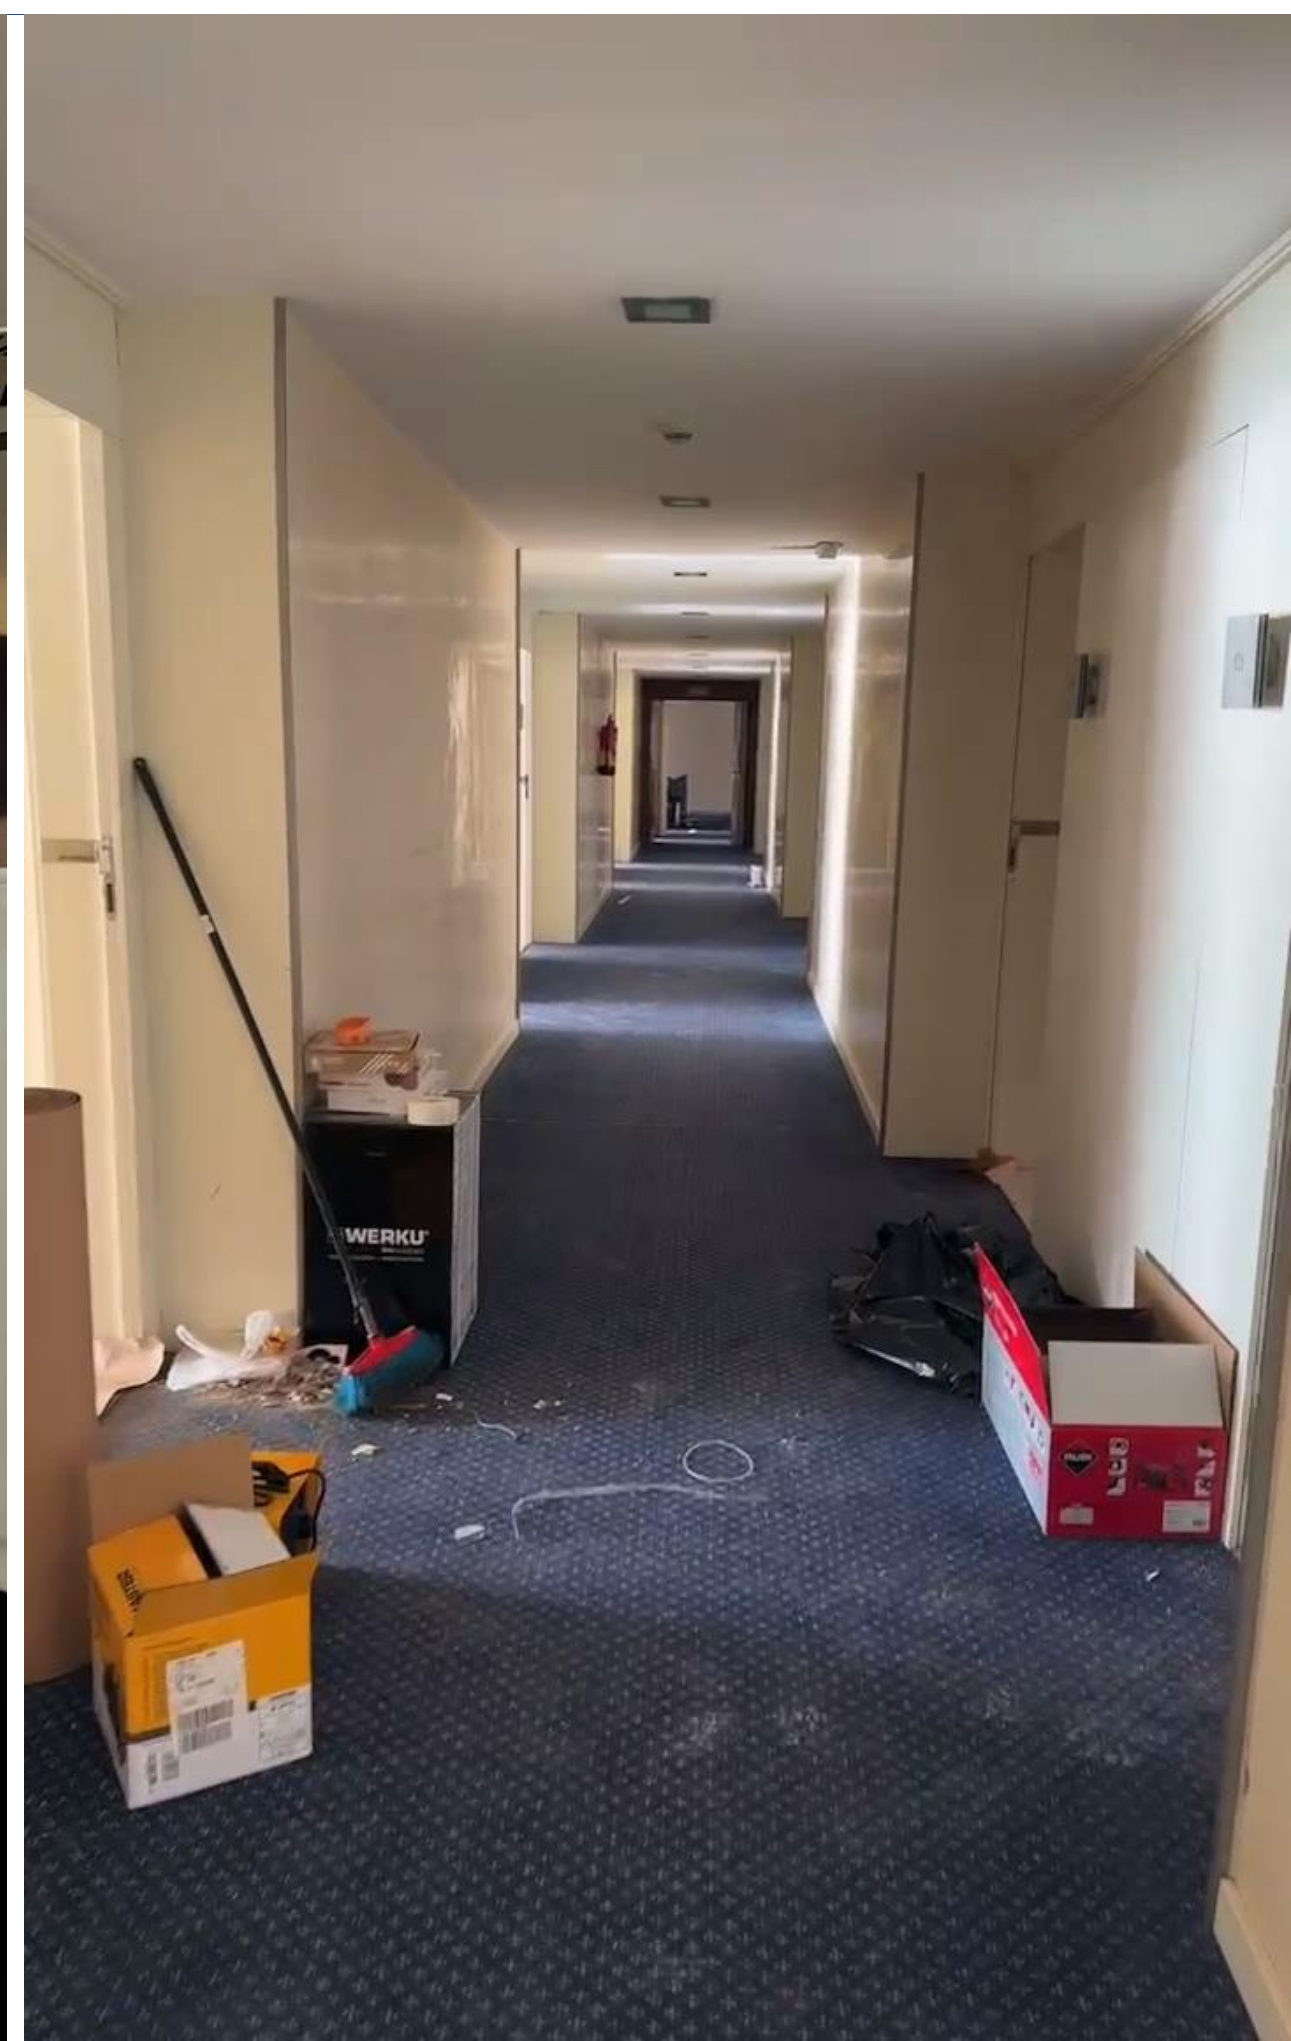

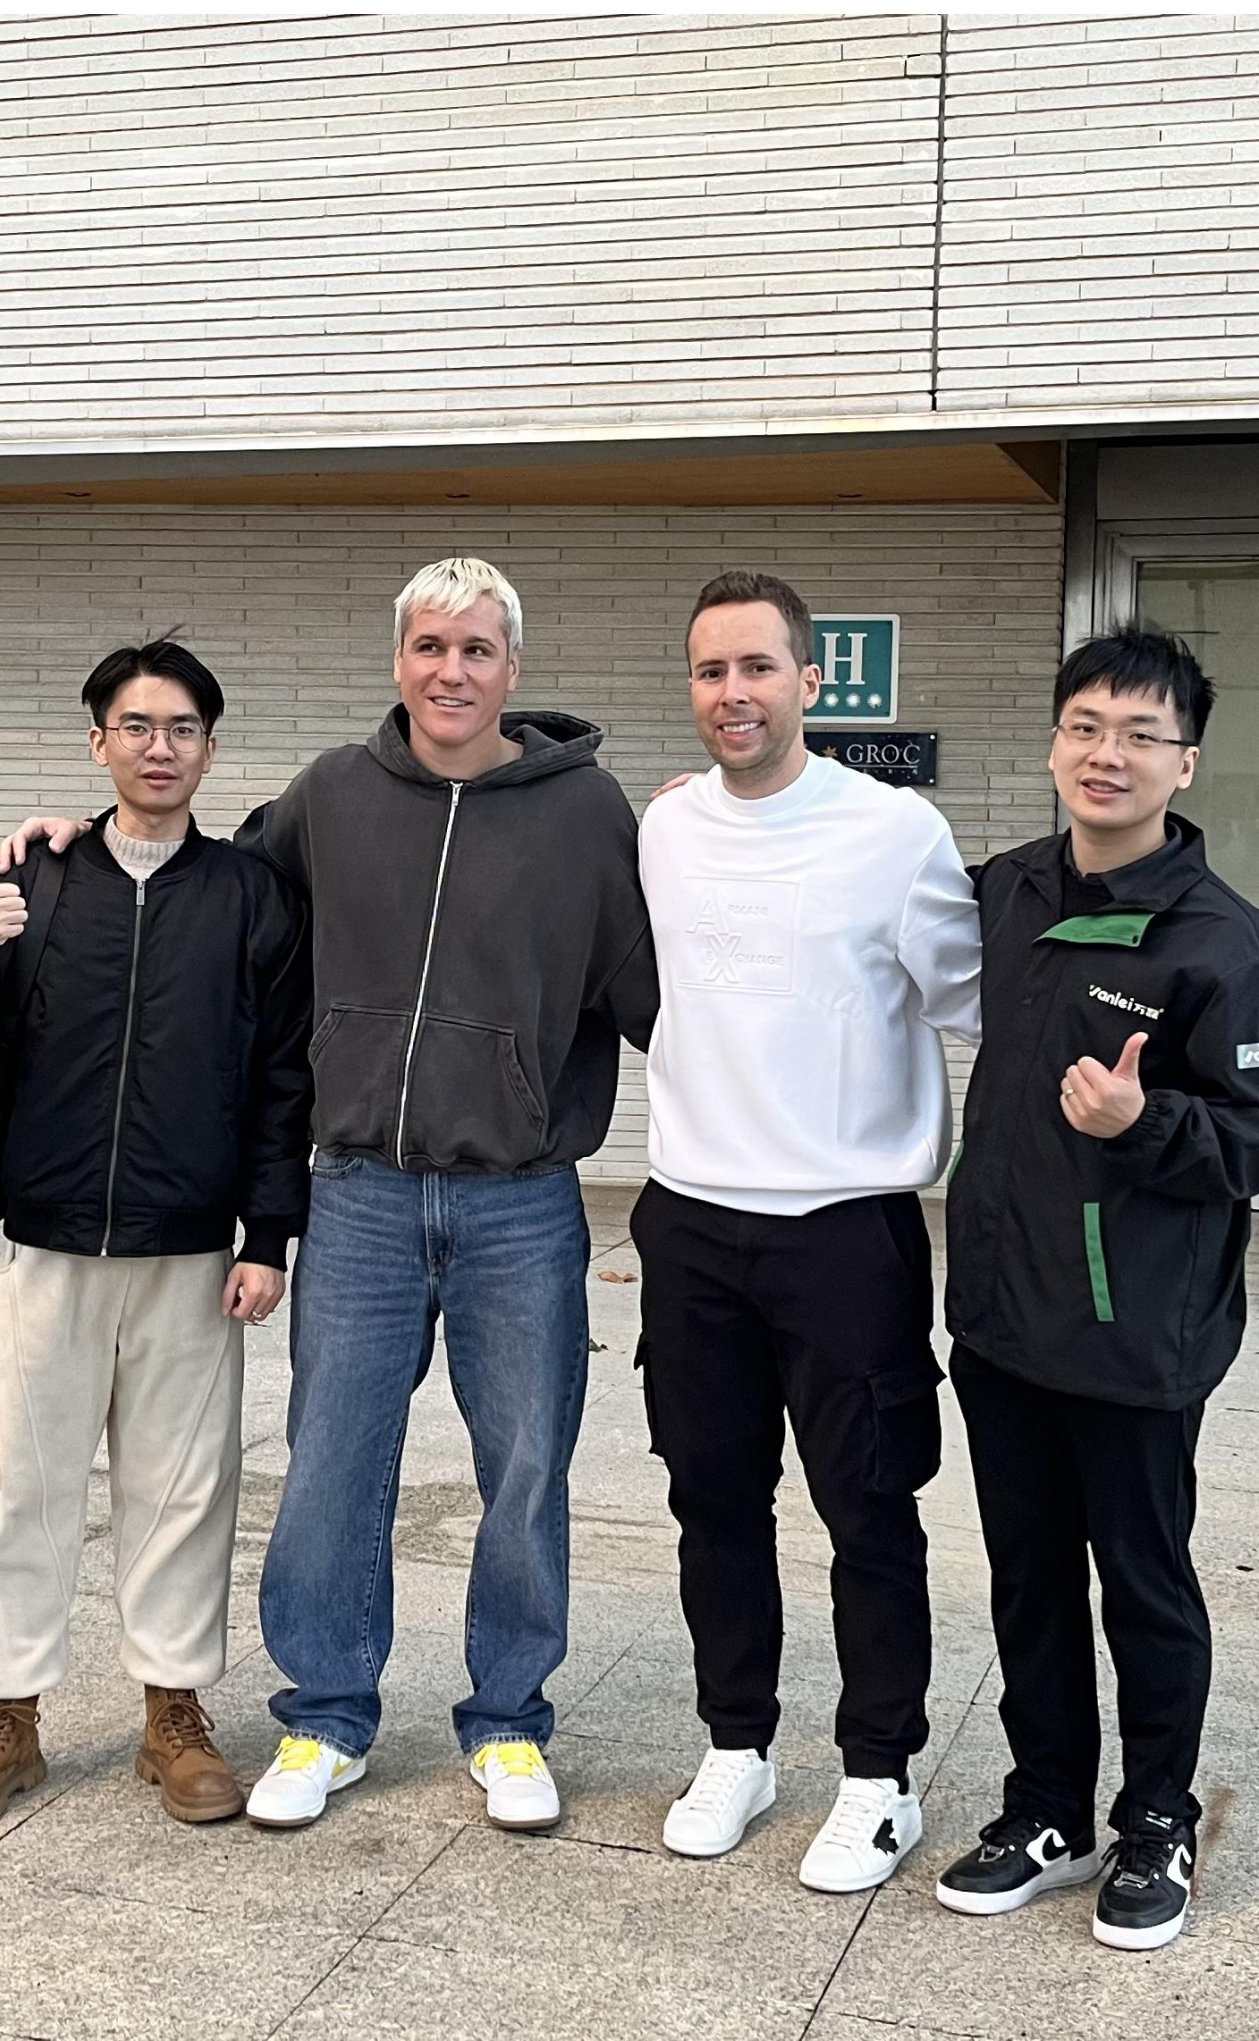

Vanlei Microcement Solutions : Over 15,000 Kilometers

Vanlei's Team Travels to Spain to Resolve Client Issues

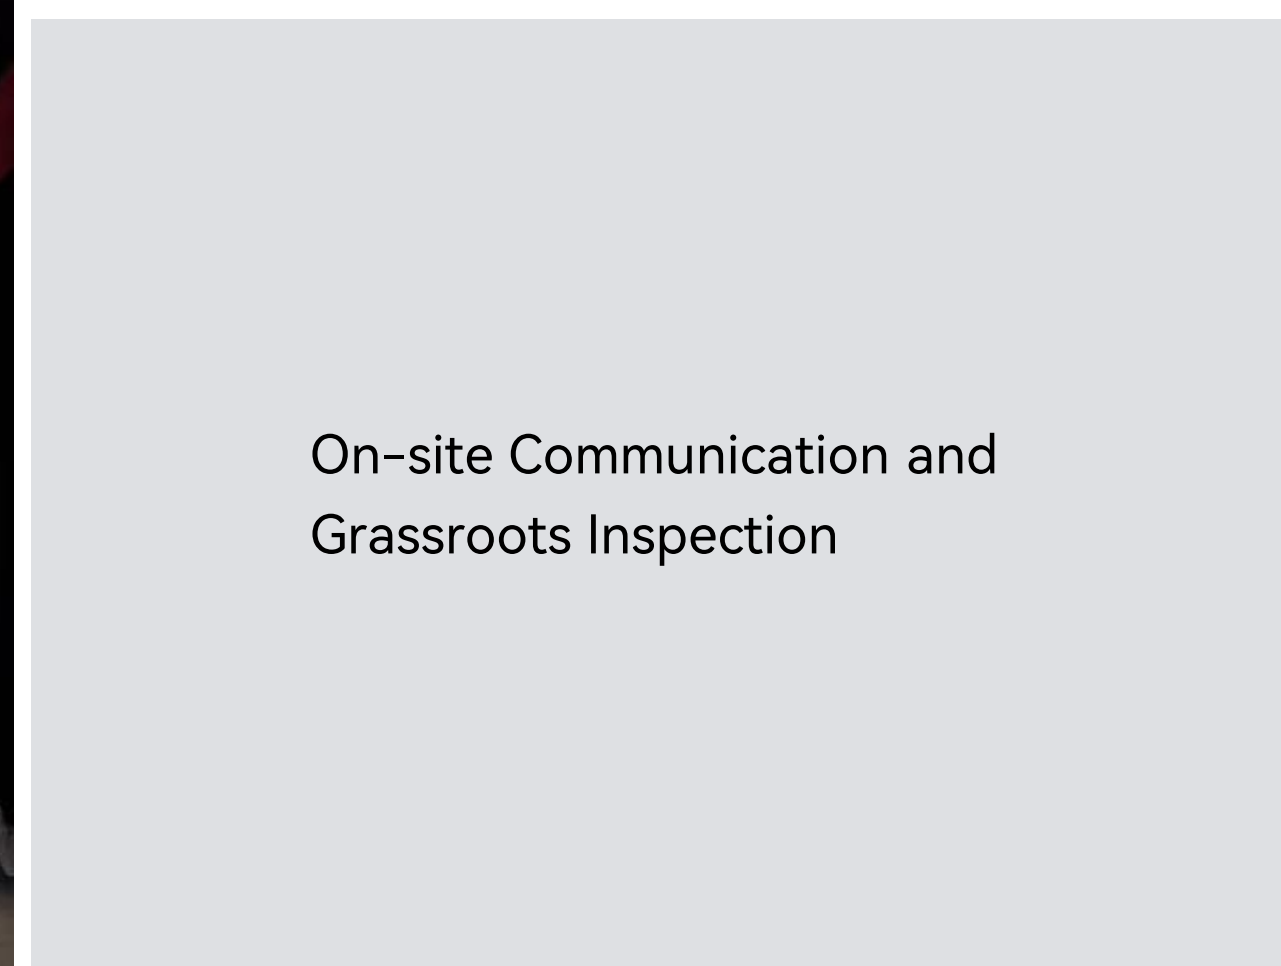

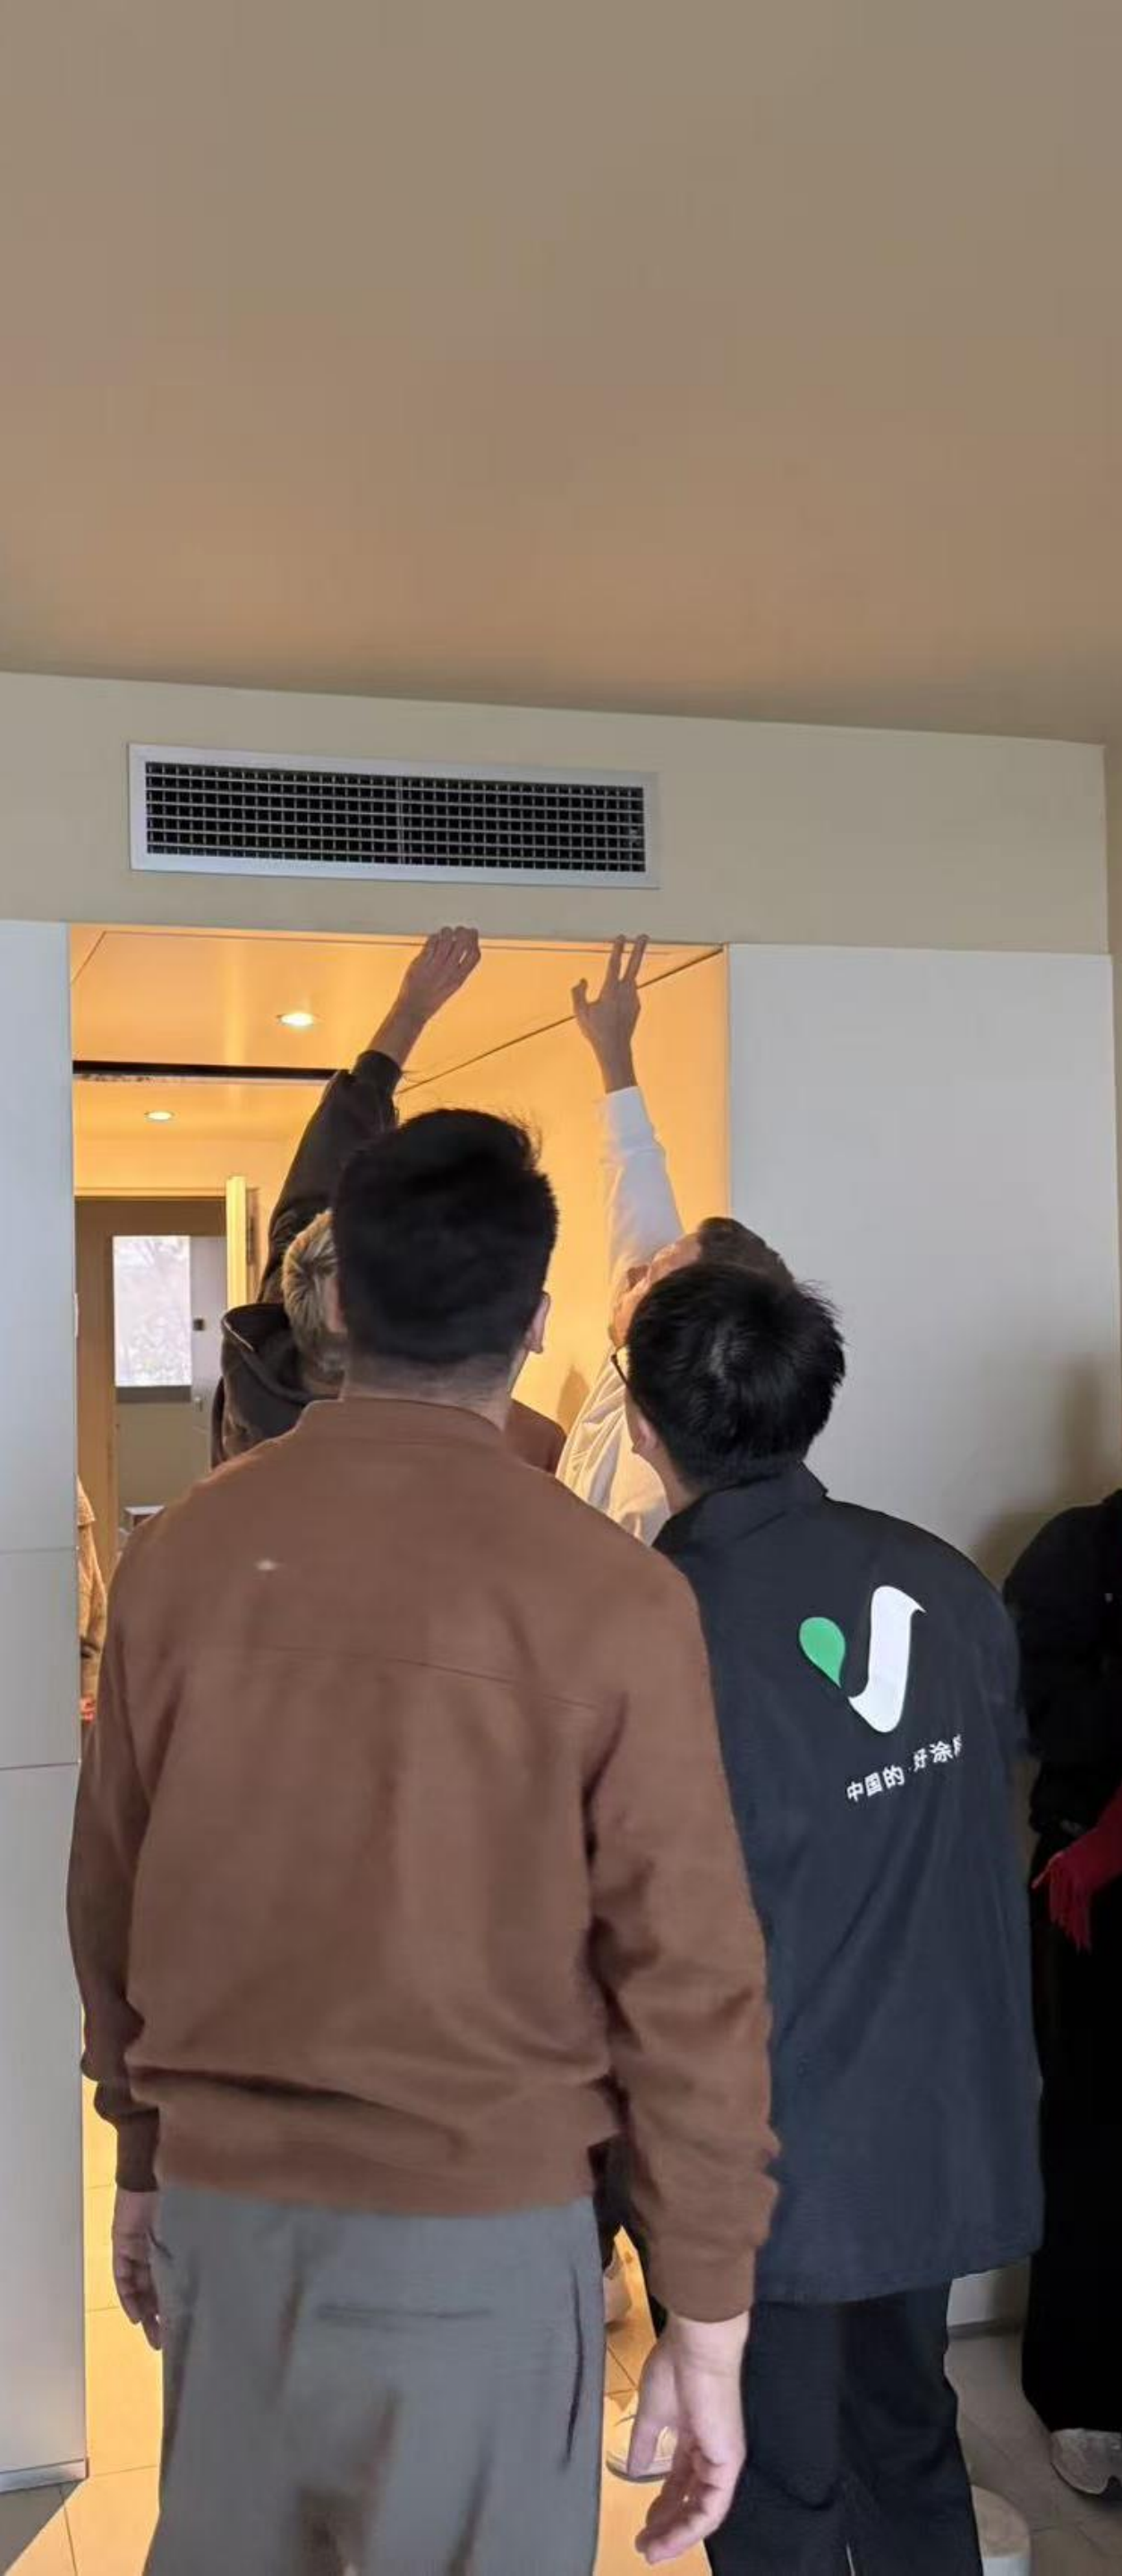

Arrived at the construction site

Immediately commenced environmental surveys
